

You decide which words you want to print off. Print off all of them for an older child like 2nd grade or a few of them for a younger child.

Also there is enough room for them to write a simple definition or trace the word in the blank space if you choose for them to do that.

Too, you can leave it blank and have them learn their vocabulary words.

Print off, cut out and put title page on top.

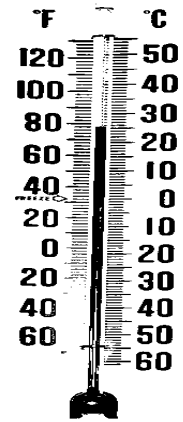

Staple at left and add to your lap book with a brad or staple into your book.
