

We need plants for many things. We need them so that we can live. Air called OXYGEN is made by plants and we breathe in OXYGEN.

Plants need CARBON DIOXIDE. We make CARBON DIOXIDE when we breathe out. Draw a picture of the plants and trees that live near your home:

Color the CARBON DIOXIDE arrow **RED**.

Color the OXYGEN arrow **BLUE**.

Color the rest of the picture and draw the plants and trees that live near your home.

Note to parent: Fold book in half.
Cut out oval title page and glue to front of mini book.
