

This book is a trifold book. However, we did not add a center line down the middle of the map to fold on as we felt it would not keep the map looking clean.

After you cut out and with book facing up, it is easier to fold the right side over to the left, folding it **only** over to meet itself and not onto the title page. Stop to the right of the title page. In other words, do NOT fold in half.

Then fold the title page back and away. You will glue on the backside of the map page or the page you first folded over. The book will trifold and open from right to left.

Instructions on the map:

Use the color or pattern of your choice to mark the temperate and tropical rain forest locations. See our website for the information or do your own research.

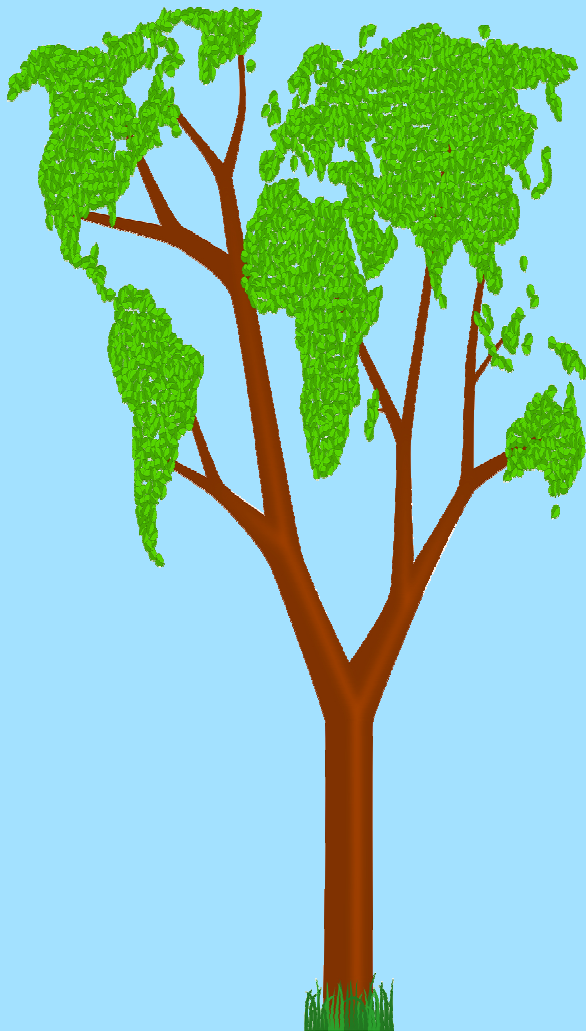

Also, decide a color or pattern for the Amazon Rain Forest Basin.

Include the Andes Mountain Range in brown. Locate and label the Amazon River in blue and the Cape Horn in yellow.

Add in any other physical or political features of your choice.

Be sure to fill out your Map Key after you decide what features you want.

The Rain Forest: Where is it?

Rainforests of the world
