

<p>What is the single largest cause of rain forest deforestation?</p>	<p>After you cut out, and with blank side of book facing up, fold in right side (tab side) and fold in left side (title page)</p>	
<p>Do you think that cleared rain forest land is good for farming? Why or why not?</p>	<p>Cut tabs on solid line to make three lift tabs. Use the information given and glue under tab or peruse your own.</p>	
<p>List some other behaviors contributing to deforestation.</p>	<p>Glue this side to your page or book.</p>	

Answers given in order from top to bottom.

<p>Commercial logging is the single largest cause of tropical rain forest deforestation.</p>	<p>No, the soil is thin and subject to erosion without the trees. The soil is not very fertile because the nutrients were held in by the trees.</p>	<p>Illegal trade in plants or animals and/or their products; clearing for ranching and farming; slash and burn agriculture.</p>
