

How do they get their energy?

HERBIVORES

These organisms eat plants for their energy.

CARNIVORES

These organisms eat other organisms for their energy.

OMNIVORES

These organisms eat both plants and other organisms for their energy.

3 side tab book.

Cut out. Fold in half.

Cut through to make three tabs.

Write in your own answers using the info from these boxes. If you prefer to cut then use the boxes.

Note: If you have a younger child, you can simply cut off the top and have them tell what each animal eats.

Ex: plants, meat and plants and meat.
