

April 14
11:40 p.m.

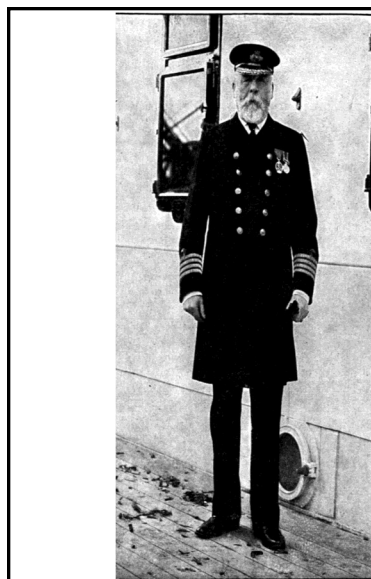

The lookouts see an iceberg dead ahead.

The iceberg strikes the Titanic on the star-board {right} side of her bow.

April 14
11:50 p.m.

Water has poured in and risen 14 feet in the front part of the ship.

April 15
12:00 a.m.

The captain is told the ship can only stay afloat for a couple of hours.

He gives order to call for help over the radio.

There are TWO timelines here that are basically the same. {you may not want to print off both}

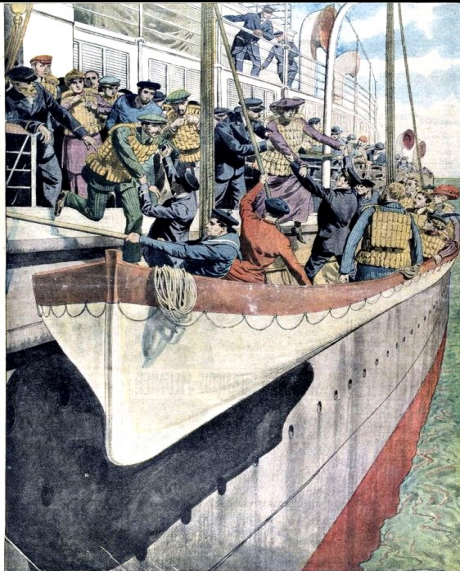

This timeline has pictures and text. The one beginning on Page 5 does not. Add your own text and pictures if you want to use that one.

Cut out the timeline and put them in order for the events that happened the night the Titanic sinks into the sea.

April 15
12:05 a.m.

Orders are given to uncover the lifeboats and to get passengers and crew ready on deck. There is only room for half of the estimated 2,435 on board in the lifeboats.

April 15
12:25 a.m.

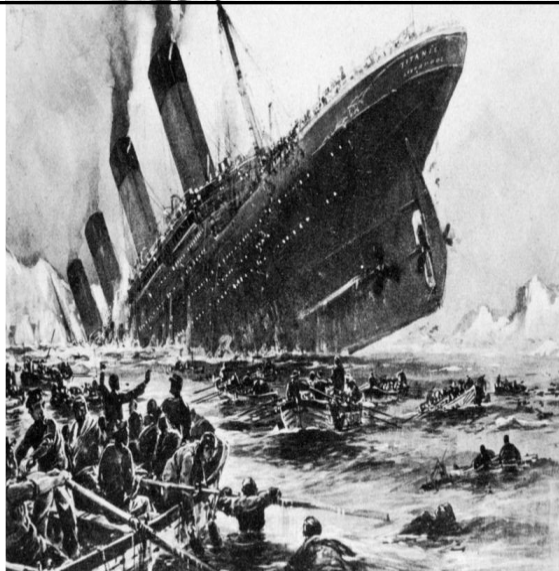

Lifeboats are now loading with women and children first. The Carpathia, southeast of the Titanic by about 58 miles picks up the distress call and immediately heads full speed to the rescue.

April 15
12:45 a.m.

The first lifeboat is safely lowered away. It can carry 65 people, but only leaves with 28 people. The first distress rocket is fired. Eight rockets are fired the whole night.

April 15
2:05 a.m.

The last lifeboat leaves.

There are now over 1500 people left on the ship.

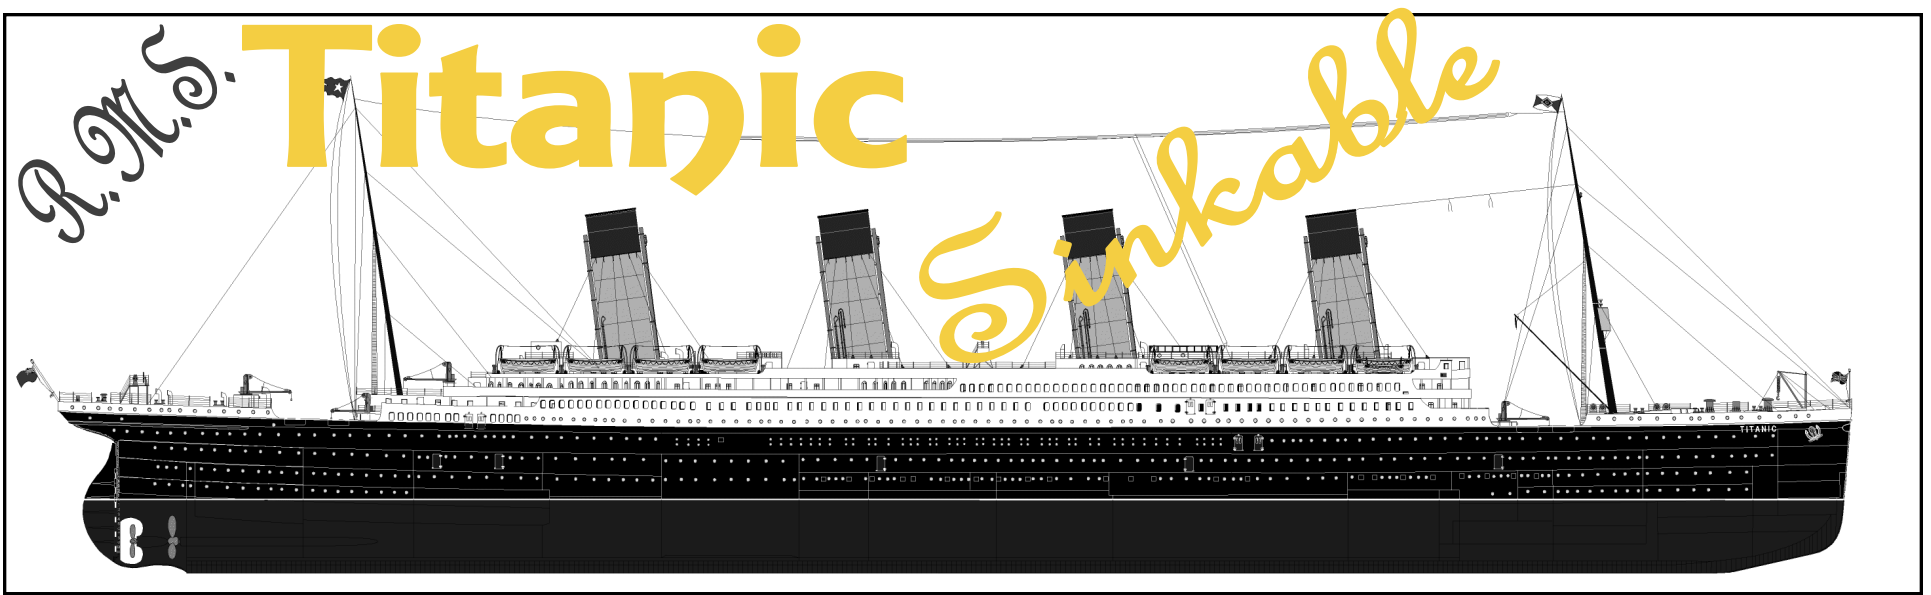

The tilt of the Titanic's deck grows steeper and steeper.

April 15
2:20 a.m.

The Titanic's broken off stern settles back into the water, becoming more level for a few moments. Slowly it fills with water and again tilts its end high into the air before sinking into the sea. People in the water slowly freeze to death.

On April 15 at 8:50 a.m. Carpathia leaves the area bound for New York. She carries 705 survivors.
